# Spring 2026 Release at a Glance

## **SOX Governance**

Automate SOX governance  
and compliance reporting

## **Geospatial Analytics**

Power location-based  
analytics with no-code  
agents

## **Vision Agent Skills**

Process unstructured  
PDFs without complex  
prompt engineering

## **Lightning Engine**

Run your most ambitious  
projects faster than ever

# Automated Governance for SOX

## Workflow Version Controls

- Isolation between development and production versions of automated workflows
- Copy, clone and roll back versions as needed for full peace of mind

## Development Sign-offs & Approvals

- Segregation of duties between development, approval and production promotion
- Version diffs, change reports and approval logs

## Automated SOX Audit Logs & Reports

- End-to-end change and access logs for all platform activity
- Immutable, full-trust logs with multi-year history

# Workflow Version Controls

Manage versions and trace every change to production workflows with **automated change management**.

## Full Version History

Every change to business logic is captured automatically between versions.

## Dev and Prod Isolation

Production stays untouched until a change is explicitly promoted.

## Instant Rollback

Restore any previous version without rebuilding.

Version	Submitter	Submitted Date	Submitter Notes	Approver Notes	Status	Approver
V7		Apr 20, 2026, 3:58 PM	Final version. Incorporates multi-currency settlement and full historical backfill capabilities. All...	Approved for production release. All prior issues verified as resolved. Multi-currency and backfill logic validated against sample datasets.	Published	
V6		Apr 20, 2026, 3:57 PM	Performance tuning for large transaction batches (10k+ rows) completed. All tests passing.	Performance improvements confirmed. Successfully tested with large-scale batches. No regressions observed.	Approved	
V5		Apr 20, 2026, 3:57 PM	Corrected the Dedupe conflict from V4. The flow now properly uses the new process.	Dedupe logic fix reviewed and working as expected. New process aligns with updated standards. Approved to proceed.	Approved	
V4		Apr 20, 2026, 3:57 PM	Added reconciliation logic, but I inadvertently broke the FX conversion from V2. Re-submitted by Ali...	Reconciliation logic looks correct, but FX conversion issue noted. Approval granted with expectation of fix in next revision.	Approved	
V3		Apr 20, 2026, 3:57 PM	Expanded the flow to handle multi-jurisdictional reporting rules.	Multi-jurisdictional handling reviewed. Logic is sound and produces expected outputs. Approved.	Approved	
V2		Apr 20, 2026, 3:57 PM	Here is the latest version with the FX Currency Conversion fixes you requested.	FX conversion fixes validated. Results match expected calculations. Approved for continued iteration.	Approved	
V1		Apr 20, 2026, 3:56 PM	Alicia, here is the Financial Reconciliation flow that Dan requested. Can you please review and appr...	Initial version reviewed. Core flow is functional. Approved with recommendation to refine dedupe process and add reconciliation logic.	Approved	

# Development Sign-offs and Approvals

Enforce **segregation of duties** builders and approvers. When a change is ready for production, its **reviewed and approved** before go live.

## Approval Gates

Analysts build and test. Managers review and approve before promotion.

## Full change Visibility

Reviewers see exactly what changed between versions before approving or sending it back.

## Comprehensive Record

Every approval, rejection, and comment is captured and retained alongside the workflow history.

Request Approval

Submit this flow for approval.

Comment

Alicia, here is the Financial Reconciliation flow that Dan requested. Can you please review and approve? Please note the new Dedupe process we discussed.

# Automated SOX Audit Logs and Reports

Get **audit-ready SOX evidence** without building it from scratch, so you spend less time preparing for audits.

## Comprehensive Logs

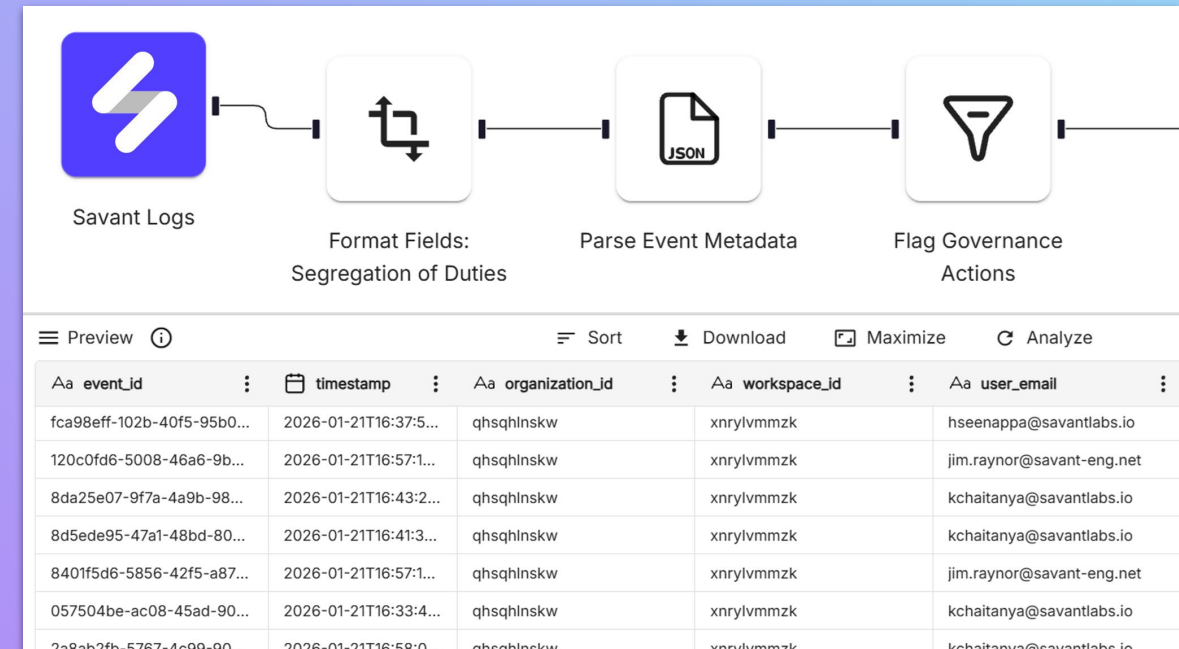

Every action across the platform is recorded to immutable logs with multi-year history.

## Logs as a Dataset

Savant Logs is a data source inside the platform that you can query and report on just like any other dataset.

## Prebuilt Compliance Reports

Start from a template designed for auditor requirements, then customize to fit your needs.

# Geospatial Analytics

Add location intelligence to your flows and get your team running geospatial analytics on day one.

## Geospatial Data

Parse addresses, geocode locations, and import spatial data directly into your workflows.

## Distance & Proximity

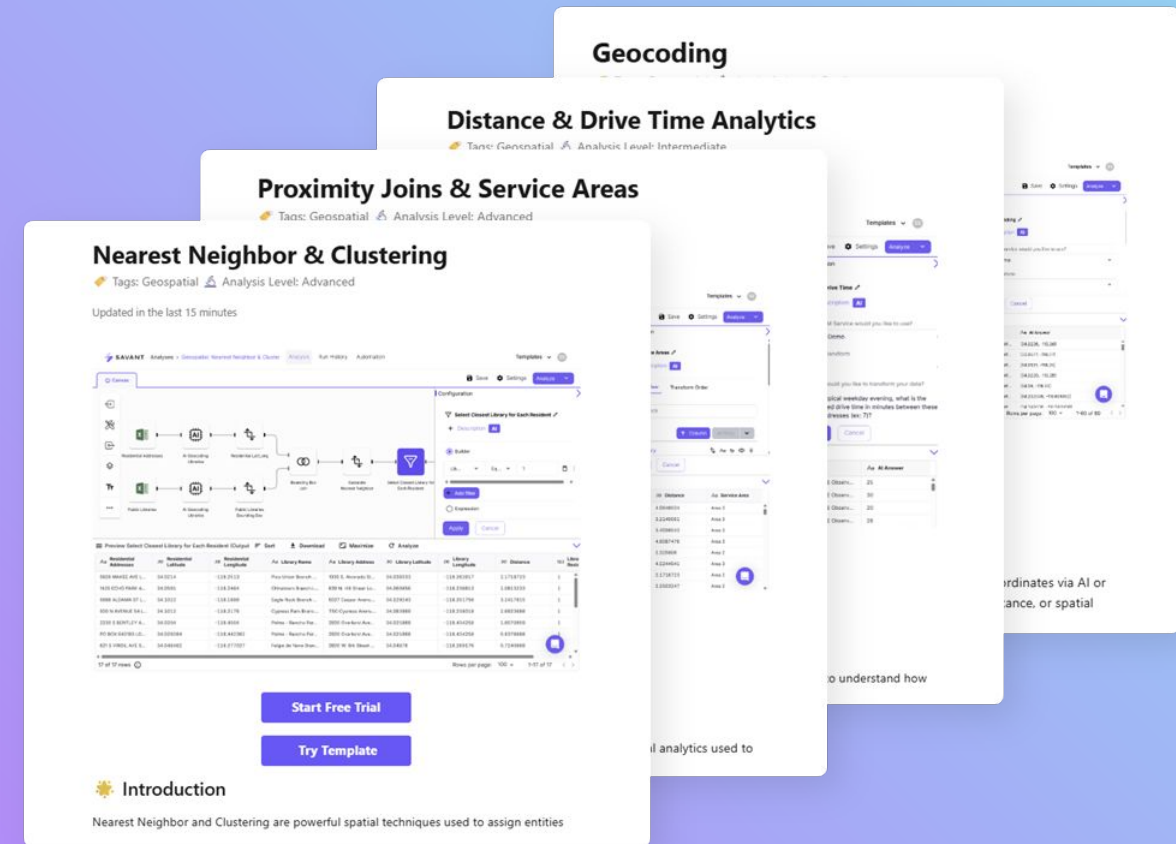

Calculate distances, filter by radius, & run drive-time analysis between any set of points.

## Joins & Enrichment

Join datasets by proximity, tag records to zones, and build territory segmentation.

## Mapping Integration

Export results to Tableau, Power BI, or any external visualization tool.

# Vision Agent Skills

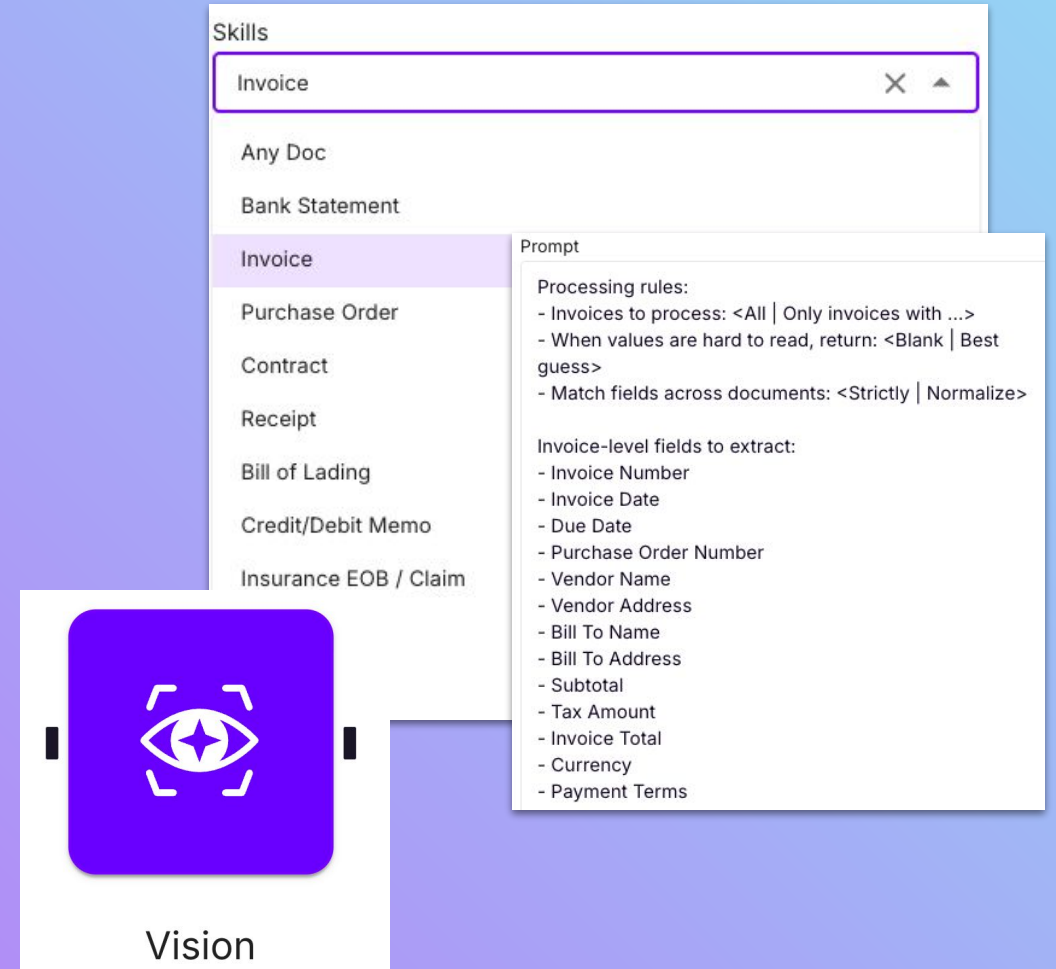

Turn **thousands of documents** into structured data **in minutes** – without complex prompt engineering.

## Prebuilt Skills

Invoices, bank statements, purchase orders, contracts, and more. Pick a skill, tailor it, and run at scale.

## Custom Document Types

Build your own skills for custom documents with the AnyDoc quick starter. All the power, none of the headache.

The image shows a user interface for configuring skills. On the left, a list of skills is displayed: Any Doc, Bank Statement, Invoice (highlighted), Purchase Order, Contract, Receipt, Bill of Lading, Credit/Debit Memo, and Insurance EOB / Claim. On the right, a 'Prompt' window is open for the 'Invoice' skill, showing processing rules and fields to extract.

**Skills**

- Invoice
- Any Doc
- Bank Statement
- Invoice
- Purchase Order
- Contract
- Receipt
- Bill of Lading
- Credit/Debit Memo
- Insurance EOB / Claim

**Prompt**

Processing rules:

- Invoices to process: <All | Only invoices with ...>
- When values are hard to read, return: <Blank | Best guess>
- Match fields across documents: <Strictly | Normalize>

Invoice-level fields to extract:

- Invoice Number
- Invoice Date
- Due Date
- Purchase Order Number
- Vendor Name
- Vendor Address
- Bill To Name
- Bill To Address
- Subtotal
- Tax Amount
- Invoice Total
- Currency
- Payment Terms

**Vision**

# Lightning Engine

Run your largest workloads faster than ever. Lightning delivers **5x faster processing** across workloads of every size, from quick analyses to billion-row consolidations.

## World-Class Performance

10x faster data prep than leading cloud engines for typical workloads, scaling from thousands to hundreds of millions of rows.

## Giga-Excel

Read and write Excel files up to 1GB across OneDrive, SharePoint, Google Drive, Box, and Dropbox.

# There's More in This Release

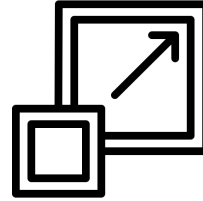

## ERP Reports Made Easy

### **ORACLE FUSION FINANCIAL CLOUD & NETSUITE CUSTOM REPORTS**

Pull existing custom report  
instantly with no rework

### **SAP S4HANA WRITE**

Publish cleaned, verified and  
updated journal entries and more

## Enterprise Scale

### **STREAMING EXCEL**

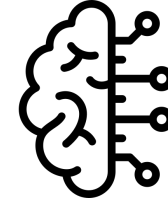

Process Excel workbooks of any  
size with support for 1GB+ files

### **SMART FILE CACHING**

Intelligently process updated files  
when working across 1000s of  
docs

### **MS FABRIC LAKEHOUSE**

Native connector for Fabric data  
Warehouses and Lakehouses.

## AI Analytics

### **LATEST AI MODEL SUPPORT**

Claude 4.7, Gemini 3.1, and OpenAI  
5.3 now available

### **SCALED-UP AUTO DOC**

Stylus agent now auto documents  
500+ node flows

### **AI ANALYTICS CERTIFICATION**

Take the all-new Savant course for  
AI Analytics master
